

MEDIA DOWNLOAD

WORKSHOP OVERVIEW

RECOMMENDED for YEAR 5 TO 6 STUDENTS

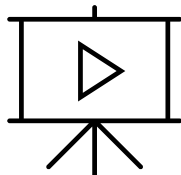

MEDIA DOWNLOAD is a seminar that develops critical thinking skills and become more media literate, which means they can evaluate, analyse, and interpret media messages effectively. This can help children make informed decisions about the media content they consume, and also develop an understanding of media ethics and responsibility. Furthermore, teaching about media can also promote diversity and inclusion. By exposing children to diverse media content, they can learn about different cultures, perspectives, and experiences, which can help them appreciate and respect differences in people. It can also help children develop empathy and compassion towards others.

SEMINAR AIMS:

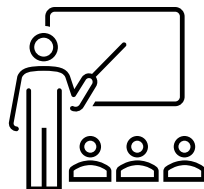

1. To help children understand the different types of media, such as television, movies, books, and social media, and their impact on society and culture.
2. To teach children about the positive and negative effects of media, such as entertainment, education, information, and advertising.
3. To encourage critical thinking and analysis of media messages, and to teach children how to evaluate and interpret media content.
4. To promote media literacy skills, such as media production, communication, and collaboration, and to encourage children to create their own media content.
5. To teach children about media ethics and responsible media use, such as copyright, plagiarism, privacy, and safety.
